PRESS RELEASE

Mecanica Ceahlău S.A. – Clarifications Regarding the Disposal of a Real Estate Asset

October 29, 2026

In the context of recent reports in the financial press concerning the sale of a real estate asset owned by Mecanica Ceahlău S.A., the company's management considers it appropriate to provide the following clarifications:

The transaction represents the disposal of a surplus real estate asset, which was no longer in operation and was not used in the company's current production activities.

Mecanica Ceahlău S.A. continues to have the premises, infrastructure, and industrial capacities necessary to carry out its activities, and therefore the transaction does not affect the continuity of its production processes or the fulfillment of its contractual obligations towards customers and partners.

The disposal of this asset is part of the company's strategy to improve the efficiency of asset management, optimize the use of resources, and strengthen its economic and financial position.

Mecanica Ceahlău S.A. continues its industrial operations under normal conditions, having all the real estate resources necessary to carry out its current operations.

Management of Mecanica Ceahlău S.A.
